Tuesday January 25th

Commenced with moderate winds and pleasant ship heading to the East. At two P.M. being below reaching at the time. I heard some one say call all hands and lower the Board. I ran on deck and every one which I saw appeared to be much flustered. I looked over the side and saw Jacob P. Rumpser trying to swim to the ship. I threw him a rope and told him to swim to the line corner which held him. He did not. Mr. Munster jumped overboard with a line in his hands trying to save him but could not. The poor man drowned before we could get a boat to him. This is hard to hear to note down any thing at the time but so it is we all must die one day sooner or later. I hope I shall never again witness the like scene. It is very pleasant the ship is moving through the water about two miles an hour not a cloud to be seen. When the boat came on board we were for some time going at though nothing had happened. The man was going out of sight and hearing. Latitude 40° North Longitude 101° 15'
